SUMMARY

I am a third-year PhD Student in Computer Science at Texas A&M University, advised by Prof. James Caverlee. My work is supported by an Avilés-Johnson Fellowship.

My research focuses on algorithms for spoken language processing. I work with large language models, automatic speech recognition systems, and psycholinguistic theories. Recently, I have also been working on recommender systems for naturalistic settings.

WORK

Software Enginering Intern at RetailMeNot May 2021 - August 2021

Used Amazon SageMaker and spaCy to get BERT embeddings for concatenated coupon titles and descriptions. Analyzed the relationship between each dimension of the BERT embeddings and uCTR using Spearman's correlation coefficient, and used PCA to find dimensions with the strongest correlations for coupon ranking.

Software Engineering Intern at RetailMeNot May 2020 - August 2020

Developed the "RetailMeNot DealFinder" Alexa Skill to help users activate cash back offers. Presented on Alexa Skill Development at the Data Science Sandbox with both Valassis and RetailMeNot teams.

Peer Teacher at Texas A&M University Dec 2018 - Dec 2019

Helped students with programming homework and answered conceptual questions by hosting office hours and assisting at lab sessions for CSCE 121 and 181. Developed notes with exercises and examples to work through as a group during CSCE 121 reviews.

Applications Engineering Intern at Silicon Labs May 2019 - August 2019

Designed and implemented the Snooper library to (1) systemize IC bus traffic snooping (I2C, UART, SPI, etc.) across different snooping devices (Saleae, Beagle, etc.), and (2) translate the traffic to a human-readable form for debugging. Responded to multiple tickets from customers using the library.

Afterschool Instructor at The Y (YMCA) Sep 2016 - July 2017

Taught multiple weekly classes at local elementary schools for the YMCA Afterschool program, and developed curriculum for the program for Lego Mindstorms Robotics and "Crazy Science."
